Chennai, Tamil Nadu | narenkumarchandran@gmail.com | +91-8838664792 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Shiv Nadar University

Aug 2023 – Aug 2027

B.Tech Computer Science and Engineering (IoT)

CGPA: 8.9

Relevant Coursework: DSA, DBMS, Operating Systems, Computer Networks, Software Engineering, AI, Machine Learning

EXPERIENCE

Infosys Springboard

Jul 2026 – Present

AI/ML Intern (Virtual Internship)

- Built an *AI-powered Internship Assistant API* using *FastAPI*, *PostgreSQL*, and *SQLAlchemy* featuring secure *JWT* authentication with token rotation, resume upload/storage, and a *LLM parsing pipeline* leveraging *Groq API (LLaMA 3.3-70B)* to extract structured candidate data from resumes.
- Architecting planned modules including *RAG-based* internship search, AI-driven job-resume compatibility scoring, skill gap analysis, and a conversational career assistant to deliver an end-to-end internship application platform.

PROJECTS

Movie Streaming Website | [Live Demo](#)

Sep 2025

- Engineered a *full-stack streaming platform* to enable personalized watch-list management by implementing secure *JWT authentication* and a custom responsive UI, resulting in a seamless cross-device experience and reduced unauthorized access risks.
- Developed a *React (Vite)* interface with *debounced live search*, genre-based filtering, and dynamic hover-triggered backgrounds, sourcing live metadata from the *TMDB API* for a smooth browsing experience.

Tech Stack: *React + Vite, MongoDB, Express, Node.js, JWT, TMDB API*

ReWear Clothing Exchange | [Live Demo](#)

Jan 2026

- Implemented an *AI-powered* second-hand clothing marketplace to streamline sellers so they don't have to manually write product details, using *Gemini 2.0 Flash* to extract title, description, category, size, and condition directly from an uploaded clothing image.
- Architected a personalized recommendation and safety layer to surface relevant listings while keeping the marketplace clean, combining a *hybrid KNN + BERT* engine with *NSFW content moderation* and a Gemini-powered shopping assistant.

Tech Stack: *React + Vite, MongoDB, Express, Node.js, JavaScript, Gemini 2.0 Flash, TailwindCSS*

IoT-Based Smart Ambu Bag Monitor | [Report](#)

April 2026

- Designed a *real-time pressure-sensing module* to give operators feedback that manual Ambu bags normally lack, sampling an *MPX5010DP* sensor on an Arduino at $\sim 20\text{Hz}$ to compute pressure and breathing rate.
- Configured a *wireless alert and monitoring pipeline* so clinicians can track ventilation remotely, using an *ESP32* to relay data over *MQTT* to a *Node-RED* dashboard with alarms for unsafe pressure levels.

Tech Stack: *ESP32, Arduino, MPX5010DP Pressure Sensor, MQTT, Node-RED, JSON, IoT*

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, TypeScript, HTML/CSS, SQL, Java

Technologies & Frameworks: React.js, Node.js, Express, MongoDB, TailwindCSS, Arduino IDE, Raspberry Pi, GitHub

LEADERSHIP & ACTIVITIES

Deputy Club Head

Aug 2024 – Present

SNUC Potential (Robotics Club), Shiv Nadar University

- Conducted hands-on workshops on *Arduino*, *ESP 32*, *Raspberry Pi* and *Embedded systems*, teaching microcontroller programming and IoT fundamentals while organizing technical seminars and college-level hackathons.

CERTIFICATIONS

Introduction to Large Language Models | NPTEL (IIT Delhi & Bombay)

Jul 2025

Ethical Hacking | NPTEL (IIT Kharagpur)

Nov 2025

Data Analytics Job Simulation | Deloitte (Forage)

Apr 2026
